

Blue Water Dust Suppression

Chile Puerto Angamos Produces Video of Dust Suppression

Chilean Port Puerto Angamos has produced a video showing dust suppression in use for their bulk loading. Angamos is very environmentally aware and are looking for innovative ways to reduce the impact of dust on employees and community They have turned to Blue Water Misting for innovative solutions.

Material loss

Traditional bulk loading loses 1-2% of material. With a dust suppression system there is no losses and no pollution

Cargo Wetting & Dry Fog

Dry fog creates very fine particles that float in the air .When they collide with dust particles do they drop out of the air. Overall wetting of cargo is < 0.5%
